1 Objective

Customer-focused professional with strong communication, problem-solving, and technical skills, seeking a customer service role to deliver exceptional support and drive client satisfaction through effective solutions and teamwork.

2 Skills

- **Communication:** Excellent verbal and written communication in Arabic (Native) and English (Upper-Intermediate, B2), adept at addressing customer inquiries and resolving issues.
- **Customer Service:** Skilled in handling customer interactions, conflict resolution, and ensuring positive client experiences.
- **Technical:** Proficient in Power BI for creating customer insight reports, Python (Pandas, NumPy) for data analysis, and SQL (PostgreSQL, MySQL) for querying customer databases.
- **Administrative:** Documentation, data entry, and process optimization for efficient service delivery.
- **Collaborative:** Experienced in team coordination, workshop facilitation, and leading group initiatives to enhance engagement.

3 Experience

Google Developer Group (GDG), Technical Lead Port Said, Egypt
2019–Present

- Led an AI hackathon for 50+ participants, improving engagement by 30% through effective communication and event coordination.
- Facilitated workshops on AI and data tools, enhancing participants' technical and collaborative skills, applicable to customer service training.
- Managed participant inquiries and provided real-time support, ensuring a seamless event experience.

Google Developer Student Clubs (GDSC), Organizing Team Port Said, Egypt
2020–Present

- Guided 100+ students in tech career events, increasing engagement by 40% through clear communication and tailored support.
- Organized data science workshops, translating complex concepts into accessible content, a skill transferable to customer education.
- Coordinated logistics and resolved attendee issues promptly, improving event satisfaction.

Hult Prize, Vice President Port Said, Egypt
2018–2020

- Managed entrepreneurship challenges, boosting participation by 25% through effective team leadership and communication.
- Streamlined event processes, improving efficiency by 20%, demonstrating organizational skills relevant to customer service operations.

4 Education

Port Said University, Faculty of Management Technology and Information Systems Port Said, Egypt

Bachelor of Technology Information Systems, Graduate 2025
